Flash memory

The SafeNet IDCore 3140 has 160 KB flash memory available for applications and data, and ensures optimization of the memory allocation, extended multi-application capability, large data capacity and lifetime. Memory can be released to the platform in real-time upon object deletion and made available to the applets. In addition, an MPCOS applet can optionally be loaded into the flash memory, making application development easier. The MPCOS applet is fully compatible with the high performance native MPCOS Operating System and can be used for secure data management and e-purse applications.
Benefits

- **Dual interface**—SafeNet IDCore 3140 offers both an ISO7816 contact interface and an ISO14443 contactless interface, also compatible with some NFC readers.
- **Flash memory**—Flash memory ensures optimization of the memory allocation, extended multi-application capability, large data capacity and lifetime. Easy application deployment thanks to the MPCOS Thales applet that can optionally be loaded in the flash memory.
- **Flexibility and modularity**—The open platform principle and interoperability enable the separation of application development (Applet) from the platform. This also supports aggressive time-to-market for introduction of new applications. Existing third-party applets from most vendors can be loaded and cards that are compatible with existing ones can be generated quickly.
- **High performance**—The SafeNet IDCore 3140 Virtual machine has been highly optimized to offer maximum software performance, making it one of the fastest Java Open Platforms available.

Performance and Flexibility

The SafeNet IDCore 3140 virtual machine has been highly optimized to offer maximum software performance without compromising security. Combined with the latest generation of high performance silicon, this provides one of the fastest Java Open Platforms available. The open platform principle and interoperability enable the separation of application development (Applet) from the platform. This also supports aggressive time-to-market for introduction of new applications. Existing third-party applets from most vendors can be loaded and cards that are compatible with existing ones can be generated quickly.

No Compromise on Security

As reflected by the CC EAL5+ / PP Java Card certification of its Java Card Operating System, the SafeNet IDCore 3140 platform implements the most advanced security countermeasures for enforcing protection of all sensitive data and functions in the card. The SafeNet IDCore Java Card OS was developed by an industry-leading security team that designed it to implement counter measures against various threats, including side channel, invasive, advanced fault, and other types of attacks.

Product characteristics

| Flash memory | 160KB Flash memory available for applications and data |
| Standards | Java Card 3.0.4  
| ISO 7816  
| ISO 14443 |
| Cryptographic algorithms | Symmetric: 3DES (ECB, CBC), AES (128, 192, 256 bits)  
| Hash: SHA-1, SHA-224, SHA-256, SHA-384, SHA-512  
| RSA: up to RSA 4096 bits  
| Elliptic curves: P-224, P-256, P-384, P-521 bits  
| On-card asymmetric key pair generation |
| Communication protocols | T=0, T=1, PPS with baud rate up to 446 Kbps at 3.57 MZ (TA1=97h)  
| T=CL, ISO 14443 type A, with speed up to 848 Kbps |
| Other OS features | PK-based DAP (to control the applets that can be loaded on the card)  
| Delegated Management  
| Support of Extended Length APDU  
| Multiple Logical Channels  
| Real Garbage collector (memory space can be recovered after individual object deletion) |
| Thales Applets (optional) | E-purse & secure data management application |
| MPCOS | |

Chip characteristics

| Technology | Flash memory  
| 16-bit microcontroller  
| Embedded crypto engine for symmetric and asymmetric cryptography |
| Lifetime | Minimum 500,000 write/erase cycles  
| Data retention for minimum 25 years |
| Certification | CC EAL6+ |

Security

- The SafeNet IDCore 3140 includes multiple hardware and software countermeasures against various attacks: side channel attacks, invasive attacks, advanced fault attacks and other types of attacks.
- The SafeNet IDCore 3140 is CC EAL5+ / PP Java Card certified
