Companies still can’t detect if their IoT devices have been breached.

Security remains a big challenge.

Blockchain: is it the answer?

Increase in use of blockchain technology to help secure IoT data, services and devices.

Security: increasing, but it’s a scatter gun approach.

Gemalto partnered with independent technology market research specialist Vanson Bourne to gain some insights from businesses on their IoT security challenges, interviewing 1,050 IT and business decision makers around the globe.
