

time. Customers can choose SDKs from a wide range of mobile service categories and fuse them together as part of a single workflow.

For example, select **Gemalto** from the Identity category and **MobileIron** from the Management category. When you click **Fuse My App** both SDKs will be integrated to your app simultaneously. The end result is a new fully integrated app which gives you secure PKI and EMM instantly as part of a single workflow, managed by your existing environment.

Integrate Gemalto with 3rd Party Apps

Appdome's App Publisher Service enables customers to integrate the Gemalto MobilePKI SDK with 3rd party ISV apps in minutes, without code or coding. Appdome partners with leading ISVs like Jive, Tango, SugarCRM, and more. Industry-specific verticals such as national police forces can be fully mobilized because they can now fuse Gemalto into mission critical apps like Versaterm and Mobile Responder.

KEY FEATURES

With *Appdome for Gemalto MobilePKI*, customers implement the full Gemalto SDK, with no manual coding. Key use cases and features enabled by Appdome for MobilePKI include:

- Smart card log-in with Bluetooth cardreader
- Industry leading PKI
- Strong two-factor authentication
- Secure key management
- Secure remote access
- Digital signatures
- Strong encryption

Figure 2: Extending PKI to mobile devices for identity providers.

In addition, Appdome includes these Advanced App Protection features – automatically with no additional effort or cost.

- Obfuscation
- Tamper protection
- Checksum validation
- App integrity scan
- Anti-reversing

APPFUSION VS. MANUAL SDK IMPLEMENTATION

Appdome for Gemalto MobilePKI	Manual SDK Implementation
<ul style="list-style-type: none"> • Codeless 	<ul style="list-style-type: none"> • Requires source code and manual coding
<ul style="list-style-type: none"> • Consistent implementation of SDK 	<ul style="list-style-type: none"> • Varies by developer, each implementation is different
<ul style="list-style-type: none"> • Platform and framework independent – works with any dev environment 	<ul style="list-style-type: none"> • Platform and framework dependencies and limitations
<ul style="list-style-type: none"> • Implement in minutes 	<ul style="list-style-type: none"> • Implement in weeks or months
<ul style="list-style-type: none"> • Cross platform (iOS and Android) – single solution, consistent functionality 	<ul style="list-style-type: none"> • Different code, resources, skillsets, and functionality for each platform

About Appdome

Appdome is the industry's first cloud hub for mobile integration. Appdome enables the rapid integration of multiple third-party functions to apps, shortening the deployment cycle and connecting mobile apps to other services on demand. The codeless service operates as a mobile integration workflow in the cloud and allows users to perform integration projects on the final application package. No source code or development expertise is required. Likewise, no modifications to an app or an SDK are required to complete integration projects on the Appdome platform. The solution is currently used by the world's leading financial, healthcare and e-commerce companies to support productivity, compliance, and security for consumers and employees. Appdome was rated a Cool Vendor in Mobile Security by Gartner in 2015. For more information, visit www.appdome.com.
