Sentinel RMS is a professional licensing management solution purpose-built to support the business needs of software publishers and intelligent device vendors. With Sentinel RMS, software and device vendors can create highly-flexible license enforcement policies and deliver a seamless user experience to customers. Sentinel RMS is an ideal solution for application deployment in medium and large-scale environments both on-premise and in the cloud.

**Flexible Licensing Models**

Sentinel RMS enables you to deploy a wide range of licensing models to support all of your business needs, now and in the future.

- **Feature-Based Licensing**: Define license terms for specific features and application modules within a single application.
- **Pre-Built License Models**: Deploy popular license models including trials, perpetual, subscription, seat-based, volume, and pay-per-use.
- **Version Control**: Control how and when customers need to pay for new software features and updates.
- **Commuter Licensing**: Enable check-out of floating licenses for offline use by remote users.
- **Time-Based Licensing**: Deliver time restricted licenses including start and expiry dates, duration from first use or cumulative elapsed use.
- **Custom License Models**: Customize models with precise licensing attributes to meet business goals and customer needs.

**Seamless User Experience**

Deliver a consistent user experience for any type of licensing model and deployment method. With Sentinel RMS you can create a seamless and transparent user experience for any type of work flow or environment even for licensed applications run on virtual machines. You can also integrate flexible fingerprinting into the user experience to control how licenses are associated to computer fingerprints.

**Our Value Proposition**

Sentinel RMS enables software and device vendors to enforce complex license agreements and protect software from unauthorized use.

- **Fast Time To Market**: Sentinel RMS solution features the widest range of ready-to-use licensing models to ensure fast time to market of your products.
- **Streamline Operations**: With Sentinel RMS you can build a fully integrated solution and eliminate the need to manage multiple disparate systems and homegrown solutions.
- **Future-Proof Capabilities**: Sentinel RMS enables you to expand your licensing capabilities with cloud licensing, usage tracking and entitlement management.

**Scalable, Cross Platform Operability**

Sentinel RMS supports your business needs and can scale to meet any volume of licensing requirements.

- **Enterprise Ready**: Deploy a high performance license server to support hundreds of features and thousands of users.
- **Fully Featured API**: Customize and streamline your licensing strategy with a comprehensive set of API functions.
- **Feature Customization**: Add pre-built interfaces such as custom fingerprinting and license server hooks to extend functionality.
- **Cross Platform Operability**: Ensure functionality and operability across different platforms and operating systems.
How It Works!

Sentinel RMS creates value for your business, and accelerates supply chain processes and business operations. The Sentinel RMS platform is used by thousands of medium and enterprise-scale businesses worldwide.

Sentinel RMS Platform Capabilities

The Sentinel RMS platform is purpose built to support all your licensing needs and business operations.

<table>
<thead>
<tr>
<th>Platform Features</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Platform Compatibility</td>
<td>Deploy on all major operating systems and compilers to ensure consistent licensing across all platforms (MS Windows, Linux, Mac, Sun Solaris, HP UX, IBM AIX)</td>
</tr>
<tr>
<td>IP Protection Methods</td>
<td>Safeguard your data and products with Sentinel Envelope multi-layer protection including encryption of runtime executable files, code obfuscation and anti-debugging</td>
</tr>
<tr>
<td>Quality of Service</td>
<td>Utilize “Grace-Period” licensing to overcome a sudden or temporary loss of network connectivity.</td>
</tr>
<tr>
<td>High Availability</td>
<td>Support redundant Licensing Servers to ensure continual use and no disruption of services for licensed applications and users.</td>
</tr>
<tr>
<td>Virtual Machines</td>
<td>Protect against license violations and enforce license policies in virtual environments. Implement license enforcement policies for detected virtual machines and provide a high level of assurance for node-locks on virtualized hosts.</td>
</tr>
<tr>
<td>Platform Extensions</td>
<td>Expand your licensing platform through the integration of cloud licensing, usage tracking and Entitlement Management applications.</td>
</tr>
</tbody>
